Arizona State University

A maroon-and-gold standard for success

When making hiring decisions, you want employees who are prepared to handle whatever you throw at them. Sustainability students understand complexity. They know how to think strategically. They look to the future. They work effectively with others to achieve a goal. And above all, they value sustainability.

When you hire a sustainability graduate, you gain a passionate employee who is committed to learning from others, trained to collaborate with people of differing perspectives, and able to understand how problems and solutions fit into larger company goals. Our graduates are uniquely prepared to help their employers create a desirable, more sustainable future.
