

Mental Illness Awareness P.S.A.

Mental illness refers to a wide range of mental health conditions – disorders that affect your mood, thinking and behavior. Your task is to research a mental illness and create a Public Service Announcement (P.S.A), poster, video or website about a disorder that many teens struggle with. The goal of your product is to make your peers more aware of the signs of the illness as well as to let them know where they can go for help.
