# TRACK THE PANDEMIC

## TASK

Interpret the data on incidents of COVID-19 infections on each continent. Prepare a chart or graph to help people understand any patterns you detect.
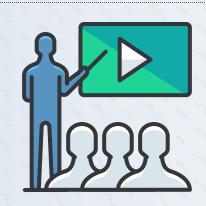

## RESOURCES

Research global cases of COVID-19. Start with these resources, but you may find others:

- World Health Organization COVID Page
- CDC COVID Page
- John Hopkins COVID Dashboard

## EXTENSION

Track the rate of recovery on each continent. Compare the results. Share your findings. Which country is recovering faster? Are there any incidents of a second wave of infection? What do you think is contributing to these results?
