

Green Thumb: Grow a Plant!

Save used green onion bulbs and replant them!

See how [here](#).

Try a garden experiment. Plant one bunch in dirt and the other bunch in water. Then, for the next week measure how they grow and record what you see ([use this template](#) or create your own). Which worked best?

Plant some seeds.

Learn about the plant life cycle and planting seeds [here](#).

What will you grow?

- 1) Have a grown up help you buy seeds.
- 2) Fill a small can or pot with dirt.
- 3) Plant your seeds.
- 4) Put them in the sun and give them a little water every day.
- 5) Put the plant in the ground or a bigger can or pot.
